

One suite. Total command... of your ArcGIS Enterprise.

Designed by the pros who live and breathe enterprise management.

THE COMMAND SUITE

*Unified operational intelligence for ArcGIS Enterprise. Three products, one platform, one team: each Command product watches a different layer of your Enterprise, and together they give you the complete picture — **what's running now**, **what's buried in your data**, and **what's coming next**.*

LIVE DIAGNOSTICS

Performance

Deep operational diagnostics for **live environments**. Proactively detects service bottlenecks and latency **before users notice**.

UPGRADE GOVERNANCE

Future Readiness

Automated upgrade governance and **compatibility auditing**. Provides clear, **multi-version roadmaps** to the next version of Enterprise.

SQL INTELLIGENCE

Data Governance

Enterprise geodatabase and **SQL intelligence**. Translates fragmented diagnostics into **database health scoring**.

ROK Command gives organizations proactive visibility into **infrastructure readiness**, **platform performance**, and **geodatabase health** — transforming reactive support into continuous operational intelligence. Ensuring your GIS is...

Always On. Always Optimized. Always Supported.
